### RESPONSIVE WEB DESIGN | FREECODECAMP

October 26, 2020

- Developed knowledge of languages used to build webpage like HTML for content and CSS for design.
- Learned how to make webpages that respond to different screen sizes and article layouts with CSS Grid.

## PROJECTS

### COUNTRIES DB | REACT, VITE

2022

- Done using Vite framework, this project focuses on getting comfortable using open APIs and practice data presentation to the user, using Axios client to make petitions to the api, the data is filtered to get a nice user experience.

### CAT BLOG | REACT, NEXTJS

2022

- Done using NextJS framework, this project focuses on building a robust application, using Headless CMS to keep back-end and front-end independent, making the application point towards scalability, project is focused on the use of seo principles like site speed and technical structure and the mobile experience.

### TODO LIST | TYPESCRIPT, VITE

2022

- Done using Vite framework, this project focuses on using the React library capabilities, like hooks and custom hooks, stores to manage a more complex state and the use of Framer-motion library to smooth the transition between the states of the program.

## SKILLS

### PROGRAMMING

Proficient:

JavaScript  
CSS • HTML

Experienced:

Python •  $\text{L}^{\text{A}}\text{T}_{\text{E}}\text{X}$  • C++  
GraphQL

Familiar:

Java • SQL • C# • C

### LIBRARIES/Frameworks

jQuery • Node.js • React • Jest  
Vite • NextJS

### TOOLS/PLATFORMS

Git • Visual Studio Code
